

# Friends of Whalebone Cove

## Annual Meeting

With Guest Speaker  
**Juliana Barrett, PhD**

Connecticut Sea Grant Extension Educator Emerita,  
Coastal Habitat Specialist

### **Whalebone Cove and the Lower, Tidal Connecticut River: Past, Present and Future**

**The Connecticut River is a unique, ecologically rich watershed with Whalebone Cove as one of the major tidal marsh systems within it. Botanically rich and physically dynamic, this presentation will explore Whalebone Cove in the context of the lower Connecticut River, why this marsh is unique and how projected changes over time such as intense rainfall events, higher air and water temperatures, sea level rise and storms may impact it.**

**APRIL 6 2025**

**3:00-4:30 PM**

**HADLYME PUBLIC HALL  
63 FERRY ROAD, HADLYME**

**Refreshments \* Free \* Public Welcome**
